

NASA SPEC IRON MUSTANG RACE CARS

From the Mustang race car crafters at Watson Racing, home of the Boss 302S and Cobra Jet!

When it comes to buying or building a race car, you want to go to a source that you can trust. You want to go to the team that has built more than just a couple of cars... you want the team that has built HUNDREDS of race cars. Experience, craftsmanship, and attention to detail are what set a Watson Racing-built car apart from all the others.

- Budget-conscious Spec Iron builds tailored to your needs.
- Watson can source the 2005-2010 Mustang GT donor cars for you.
- Full Nasa-spec cage and safety equipment.
- Built to NASA guidelines, with flexibility in options to your liking.
- Ready-to-race:
 - In-house chassis-dyno tested to meet power/weight requirements.
 - Full alignment and initial chassis set-up included including driver weight.

Watson Racing
